

Post 1857 Wills Index Sorted by Forename

The Probate Calendar that I have extracted to date is shown below sorted by forename and then chronologically by date of death. The table shows the date that Probate was granted (and in some cases this might be several years after death). A = Admon and P = Probate (or Will). The place of residence, approx value of the Will and date of death is also shown. If I have a copy of the Will, I have shown a "Y" on the line of entry.

The abstracts, in separate files, are grouped in decades sorted by date of death.
